The system approach is top took upon management as a system or as “œan organised whole“ made up of sub- systems integrated into a unity or orderly totality. Systems approach is based on the generalization that everything is inter-related and inter-dependent. A system is composed of related and dependent element which when in interaction, forms a unitary whole. A system is simply an assemblage or combination of things or parts forming a complex whole.

### **System Approach to Management: Definition, Features and**

This paper proposes a definition of systems thinking for use in a wide variety of disciplines, with particular emphasis on the development and assessment of systems thinking educational efforts. The definition was derived from a review of the systems thinking literature combined with the application of systems thinking to itself. Many different definitions of systems thinking can be found throughout the systems community, but key components of a singular definition can be distilled from the ...
