Ecological economics (also called eco-economics, ecolonomy or bioeconomics of Georgescu-Roegen) is both a transdisciplinary and an interdisciplinary field of academic research addressing the interdependence and coevolution of human economies and natural ecosystems, both intertemporally and spatially. By treating the economy as a subsystem of ...

1. Updated understanding of proprioception. Body movement is a fundamental and essential component of human life. In daily activities, most of what a human does in their interaction with the environment is associated with the generation of movement.

### **Assessing proprioception: A critical review of methods**

Ecosystem functions are defined as the capacity or the potential to deliver ecosystem services (de Groot et al., 2010). Ecosystem services are, in turn, derived from ecosystem functions and in Fig. 1 they represent the realized flow of services for which there is demand.
